MBDS Secretariat has brief about risk assessment in public health threats procedure and Training to Regional members. The results can be used by medical facilities in other Member States for similar risk management and communication. The training workshop was organized with the cooperation of the Regional Disease Surveillance Network (RDSN), which is a platform for sharing risk management and communication strategies.

Under the Canada’s Weapons Threat Reduction Program, MBDS Secretariat has meeting with MBDS Country Coordinator from Cambodia, Mr. Sok Samnang, who is leading EBS Application development for LMV countries. Myanmar is planning to implement MBDS EBS real-time reporting application in near future. Under the Canada’s Weapons Threat Reduction Program, MBDS Secretariat has meeting with MBDS Breakthrough Action Package (BAP) teams.

MBDS has developed "Risk Assessment Training Guideline for Public Health Threats" which has been published on MBDS website. This training guideline aims to provide comprehensive training for risk assessment in public health threats for public health professionals, risk communicators, and other risk management experts.

The MBDS (Mekong Basin Disease Surveillance) cooperation is a self-organized regional network commenced since 2001. It is a collaborative effort among six Mekong Basin countries: Cambodia, China, Lao P. D.R, Myanmar, Thailand and Vietnam under The Health Ministerial MOU. The MBDS Secretariat Office has been updating National and Regional disease information on MBDS website and those updates can be easily accessed via MBDS Facebook, MBDS Instagram, and MBDS Twitter.

Dear MBDS Colleagues,

In this opportunity, MBDS Secretariat also informed about current implementing activities including MBDS One Health Event Base System. This Action Package aims for real-time bio-surveillance with capable national laboratory systems and effective information sharing mechanism.

MBDS has been updating useful links (Disease Surveillance Networks, Health Related Links, Links for Disaster Management, etc.) regularly. The links which are easily accessed via MBDS Facebook, MBDS Instagram, and MBDS Twitter.

Regional Public Health Laboratory (RPHL) Network, which is hosted by Department of Medical Sciences, Ministry of Public Health, Thailand. During meeting, all participants have discussed the RPHL Network’s role in the regional disease surveillance and response. The guideline was developed with basic guidance options related to risk assessment, for public health threats, such as: considering all of the health-related activities, conducting comprehensive risk assessment, risk management and communication, training and evaluation (D&B), and information sharing mechanisms.

In order to strengthen risk management and communication, MBDS Secretariat has started implementing risk assessment training guidelines for public health threats. This training guideline has been developed with comprehensive training for risk assessment in public health threats for public health professionals, risk communicators, and other risk management experts. The guideline has also considered the current risk assessment in public health threats.

MBDS Secretariat has been collaborating with the "National Disease Surveillance" network under the National Foundation Building. During virtual meeting, the National Foundation Building and its equivalent partner, updated the regional members and 2013 collective member for this opportunity. MBDS Secretariat also informed about current implementing activities under the 2013 collective member, including CBDS (Mekong Basin Disease Surveillance) and RPHL (Regional Public Health Laboratory) Network.
